DETAILED ACTION

Response to Arguments

The Examiner acknowledges the Applicants cancellation of claims 1-7.

Allowable Subject Matter

Claims 8-14 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claim 8, the upgrade method comprising: removing the second printed circuit board circuit with the nonvolatile memory from the socket on the first PCB; disposing the second PCB with the nonvolatile memory on a writer; writing a new program into the nonvolatile memory by the writer; inserting the second printed circuit board with the nonvolatile memory into the socket, wherein the new program is stored in the nonvolatile memory; and downloading the new program stored in the nonvolatile memory to the FPGA by the downloading unit.

Regarding claim 9, as being dependent on claim 8.

Regarding claim 10, the first printed circuit board having a power put region and a plurality of I/O pin regions, where the power pin region is separated from the I/O pin regions and where each I/O terminal of the FPGA is electrically connected to a corresponding pin in the I/O pin region, all power terminals of the FPGA are electrically

connected to pins in the power pin region, and pins in the power pin region and the I/O pin region are connected to external circuits through different connectors.

Regarding claims 11-14, as being dependent on claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
